

Popular Microsoft Dynamics AX Add-on Releases Milestone Version Tailored to Helping Organizations Meet Auditing & Compliance Requirements

Arbela Technologies builds on its successful Dynamics AX Gold Certified ISV Solution - Arbela Security Manager for AX 2012 V3.5 which Includes Significant Enhancements in its Security Compliance Capabilities.

Irvine, Calif., October 12, 2015 — Arbela Technologies, a trusted and proven name in innovative ERP, CRM, supply chain, financial, manufacturing, security management and compliance solutions, announces significant enhancements in its Arbela Security Manager (ASM) Solution for Microsoft Dynamics AX 2012.

Arbela's recent release of the Security Manager for Dynamics AX 2012 builds on its Segregation of Duties (SoD) Capabilities, which includes: access and data watch lists that operate on the actual Dynamics AX entry points and capabilities versus traditional reactive table based rules.

"The latest capabilities in ASM are a direct feedback from our clients wishing a more accurate and an easier to use solution for their auditing needs" said Corey Bakhtiary, Product Manager at Arbela Technologies. "These new capabilities will reduce our client's costs in addressing their audit needs, prevent malicious and unintended access to the systems, and reduce overall security management significantly," said Corey Bakhtiary.

This recent release addresses some of the challenging requirements around the management of Segregation of Duties; including a more accurate method of identifying the risks and easy to use rules creation based on securable objects for both SoD, access and data watch lists.

Some of the new capabilities include:

- Object based Segregation of Duties and Watch List rules creation.
- Conflict identification, tracking, reporting, resolution and approval process.
- Proactive Dynamics AX role assignment preventing assignments against the approved rules.
- Workflow and electronic signature approval.
- Database level tracking and tracing capabilities.

Arbela Technologies invites you to contact us to learn more about our recent release of our Arbela Security Manager V3.5 for Dynamics AX 2012. To learn more please visit: www.arbelatech.com. In addition, you can visit us at Booth 204 at the upcoming AXUG and CRMUG Summit in Reno, NV in October.

About Arbela Technologies

Based in Southern California with a global footprint, Arbela Technologies empowers its clients to transform their organization to meet the ever changing market demands. We provide industry specific financial, supply chain, manufacturing, operations, and customer relationship management solutions combined with strategic change management experience for Microsoft Dynamics AX, Dynamics CRM and Microsoft Azure. Arbela's vertical expertise includes building material, advanced material, life sciences, industrial and high-tech manufacturing, distribution, and retailers.

Arbela has been implementing and supporting Dynamics AX and Dynamics CRM to midsize and large enterprises across the globe with superior results. In addition, Arbela develops, markets, and supports critical add-ons for Microsoft Dynamics AX 2009 and 2012.
